

Why Buy Fair Trade?

Because ~

Everyone deserves a decent life and Fair Trade helps people achieve this

The Fairtrade Mark is a registered independent product certification label and represents an alternative system of international trade. Fair trade provides a better deal for producers in developing countries. It creates opportunities for farmers and workers to improve their lives and communities, and to protect their environment.

Fair Trading means trading to the same ethical standards as laid down by the Fairtrade Foundation, but for products that are not certified by the Foundation ~ crafts, musical instruments, jewellery, etc.

Fair Trade products are made by people who care about the quality of their work because we care enough to pay them a fair price. This small action makes little difference to the final price we pay, but it makes a huge difference to these Third World workers.

Simply The Best is committed to using only suppliers who also commit to Fair Trading, most of whom are members of The British Association for Fair Trade Shops (BAFTS), of which STB is also a member. Simply The Best also sources some recycled products from the UK and Europe, where Fair Trade isn't an issue, but looking after the World we all live in still is...

Gavin Wright, Owner of Simply The Best
